

RELEASE THE MUSIC

QPLUS Reference with DEVIALET Amplifier

At Quadraspire we are music lovers. We would like everyone to get the most out of their HiFi systems and enjoy the thrill of live or studio music in their homes. We strongly believe this is possible with the right set up including the right support for your HiFi, whether it be one of our HiFi racks or QPlus interfaces.

HiFi components can produce and absorb energy that may have a detrimental effect on sound. Unlike isolation devices or platforms, the QPlus range of interfaces have been designed to mimic our HiFi racks that reduce and dissipate resonance

QPLUS Advanced with NAIM NDX Streamer

to deliver a clearer, cleaner musical performance. Try the QPlus under any or all of your components and hear for yourself how QPlus takes your HiFi to another level of musical enjoyment.

Placing a QPlus under each foot (not the chassis) of a component, will help achieve better performance out of your equipment whether it is situated on a piece of furniture or inside a cabinet, transforming your furniture into a HiFi rack. Instruments separate, bass extends and becomes more controlled. Music becomes more lifelike and real as the soundstage opens up.

QPLUS Reference with REGA RP10 Turntable

The QPlus is a sealed unit and not intended for disassembly. Any attempt to take the QPlus apart will invalidate any warranty.

Please note that the QPlus is not designed for use under speakers. For speaker support please use our QX7 or QC sound enhancers.

The metal body of the QPlus has been waxed to preserve its finish but may patinise over time. To clean the body, we only recommend Pre-Lim surface cleaner and then Renaissance wax polish available from www.picreator.co.uk. Other metal cleaners may damage the overall finish.
